## About St Luke's Hospice

St Luke's looks after people with cancer & other serious progressive illnesses, such as motor neurone disease & heart, lung & kidney failure. St Luke's is not a NHS Hospital, nor an exclusive private facility; we are an independent charity & are proud to be able to offer all our services to patients & their families free of charge. We are increasingly reliant upon the generosity of our supporters to raise the additional funding. Over 80p of every pound of our income is spent on the costs of patient care.
